## **City of Centralia Electric Aggregation Notices**

The City of Centralia has renewed our municipal electricity aggregation program with a new supplier, Constellation NewEnergy. The City primary goal is to protect our residents from the continued rise in electric supply rates.

The City along with their consultant Good Energy LP has secured a fixed rate of \$0.1210 cents for a 22-month term starting in February, which is less than the current Utility PTC. Therefore, if the rate with Ameren continues to increase, the residents and small businesses in our community have the option of price protection.

All City of Centralia residents and qualifying small businesses will receive further notification by mail pertaining to their community's municipal aggregation program.

### **Opt-Out Notices**

The opt-out notices will come from Constellation NewEnergy explaining your community's new aggregation program.

If you were previously part of your community aggregation program and wish to continue the benefits of the program, **simply do nothing** with the letter, you will automatically be re-enrolled in the program.

Upwards of 90% of all eligible residents participate in the community aggregation program. Although savings are never guaranteed, residents who have participated in the program since its inception 10 years ago have saved money over Ameren Illinois rates.

### **Opt-In Notices**

These notices are for residents and qualifying small businesses who were not part of the aggregation program and are with an alternative supplier.

If you receive an opt-in letter, we encourage you to check your rate with your current supplier and verify there are no early termination fees before making any changes. If you are under an expired contract or find it beneficial, you may opt into the program immediately.

To opt-in you will simply log into the Constellation NewEnergy site listed on the letter and enter the number code provided in the letter and it will take you right to the opt-in site.
